Compression Therapy Insurance Coverage Criteria

1

Prescription of Ordered Item

Note: Prescription required when ordering pressure over 30 mmHg or if patient will try to utilize his/her insurance for coverage.

2

Medical Record Documenting:

1. Diagnosis which is being treated (i.e. edema, varicose veins, prevention of DVT, etc.)

Special Notes:

- Not all insurance companies cover compression therapy
- We recommend that all patients be fitted for compression therapy. If patient is being treated for swelling, best time for a fitting is in the morning prior to swelling becoming uncontained.
